

Sprayer Preseason Checklist

As a way to better service our customers for the most uptime, we want to provide you with some preseason checkpoints.

1.) Check and Clean

- Clean filters and install all caps/plugs.
- Check for leaks.
- Check spray pattern.
- Examine booms for defaults.

2.) Wheels and Tires

- Check the tire pressure - see owners manual.
- Check the wheel nut torque - see owners manual.
- Check wheel bearing & wheel seals for leaks.

3.) Lubrication

- Grease all bearings/pivot points (tracks & booms).
- Verify oil/grease level is adequate on tracks/tire hubs.
- Check cable and wiring.
- Verify boom height is on and calibrated.
- Verify sprayer sections work properly.
